Wood-Ultrex® Series

COMBINE THE VIRTUALLY INDESTRUCTIBLE
ULTREX EXTERIOR WITH THE ELEGANCE
OF A REAL-WOOD INTERIOR.

Wood-Ultrex Series

- A full line of standard-size windows and doors.
- LoE² and LoE³-366[®] insulating glass with Argon gas.
- Low-maintenance, high-durability Ultrex exteriors.
- Beautiful natural-grain wood ready for stain or paint, or pre-finished in white.
- Beautiful hardware available in several classic finishes provides design flexibility for remodel and replacement projects.
- Lite patterns, finish color options and factory mulling allow for custom appearance.
- Integrity offers ENERGY STAR and tax credit qualified products.

Our many years of experience have led to one conclusion: no two remodeling or replacement projects are alike. That's why Integrity® from Marvin offers an abundance of sizing, equipment, aesthetic, performance and configuration capabilities.

The Ultrex® Advantage.

Take performance to the next level with the Ultrex Advantage. Strong, stable and durable, Ultrex is possibly the perfect building material. It's made from pultruded fiberglass, specially compounded resins and thin strands of strong glass that are combined to create a material so tough it's used in bridge construction. Imagine what that level of durability can endure in your home.

- Low-maintenance Ultrex is as strong as steel and eight times more rigid than vinyl, easing installation and creating a secure, long-lasting fit that stays square and true.
- Ultrex has a low thermal expansion rate, preserving a tight seal, resisting leaks, seal failures and stress cracks.
- Patented Ultrex premium finish offers superior performance reducing chalking, fading, scratching, UV degradation and worries.
- Integrity offers ENERGY STAR and tax credit qualified products.
- 15+ years of proven experience have led to superior tooling capabilities, meaning all Ultrex parts are optimized for performance requirements.
- Benefit from exceptional fit and finish, including detailed radius profiles and clean, balanced sightlines for an architecturally correct appearance.

Ultrex® strength means Integrity® windows and doors offer superior performance and durability for many years to come.

Commitment to sustainability.

Energy efficiency is one of our top priorities. Integrity® windows and doors offer ENERGY STAR and tax credit qualified performance. And because Ultrex® components expand and contract at virtually the same rate as glass, our products remain tightly sealed resisting leaks, seal failures and stress cracks.

We also continually explore how to lessen our impact in all steps of the manufacturing process.

- Ninety-five percent of all Volatile Organic Compounds (VOCs) created during the manufacturing of Ultrex are destroyed, which means our facility qualifies for the Maximum Achievable Control Technology (MACT) designation by the Environmental Protection Agency (EPA).
- Fully recyclable window packaging consists of corrugated cardboard and banding.
- Wood pallets and wood scraps are used for fuel recovery.

Experience the design flexibility, beauty and lasting value of Integrity windows and doors, inside and out.

Uncompromised service.

Combine 15+ years of residential remodeling and replacement experience with our vast array of products, unmatched delivery and network of dedicated Marvin service and support specialists – it's no wonder Integrity is the perfect choice for your next project.

Every Integrity window and door is protected by a company renowned for standing behind its products with world class service and support for nearly 80 years.

- Backed by a fully transferable 10/20 warranty (10 year warranty against manufacturing defects; 20 year warranty against glass seal failure).
- Through-jamb installation allows for installation directly into the existing opening without damage to siding or trim.
- Industry-leading on-time, complete, and defect-free delivery.
- Easy to specify, easy to order – our short lead times and consistent delivery make life easier.

"We worked with the Snow's on choosing a window that would be the main focal point of their home. It was an easy decision. Integrity® windows are probably the best quality/value window in the industry. An energy efficient fenestration value, reasonably priced and with SDL – Integrity captured the breath taking panoramic views, while preserving the original character of their home."

FOR A WEALTH OF INSPIRING REMODELING IDEAS, VISIT INTEGRITYWINDOWS.COM/REMODEL

Fulfilling home remodeling needs for more than 15 years.

All Ultrex® Series

The amazing resilience of Ultrex, a proprietary pultruded fiberglass material that outperforms and outlasts vinyl, makes this series an excellent choice for any residential remodel, addition, or replacement project. Beautiful, easy to use and extremely low-maintenance windows and doors give you everything you want plus the reputation for quality that comes with Marvin Windows and Doors.

Wood-Ultrex Series

The Integrity Wood-Ultrex Series is setting new standards in low maintenance and top aesthetics. Now you don't have to sacrifice performance for the aesthetics of real wood, or vice versa. The Wood-Ultrex Series lets you enjoy the best of both worlds. Available in the most popular sizes and styles of windows and doors, this series offers even more options for your next remodeling or replacement project.
