

Vented Sidelites

THERMA TRU
DOORS

There is a difference.

More than a sidelite with hinges.

As the fastest growing category in hinged entry and patio doors, vented sidelites meet the needs of homeowners seeking ventilation, convenience and aesthetics.

Unlike many retrofit options or rush-to-market choices that simply put hinges on existing sidelites, Therma-Tru

re-engineered sidelites specifically for the vented application.

Currently, Therma-Tru creates the only continuous, complete fiberglass systems for entry and patio doors that offer decorative glass design options.

Therma-Tru re-engineered sidelites specifically for the vented application.

Continuous Systems

Designed as fully integrated units, continuous systems can be configured with one hinged door and one or two hinged sidelites, or two hinged doors (French) and hinged sidelites.

Structural Integrity

Specially developed wide patio mullions provide required structural strength for years of dependable operation.

Engineered Components

Continuous, recessed strike plates, multi-point locking gears and removable screens are specifically designed for sidelite applications.

A Small Door

Not a swinging window, vented sidelites are small, narrow doors with sturdy stiles to accommodate anchors for hinges and lock gears with easy-to-operate handlesets.

Choices ... for entry or patio.

Offer your customers a great entrance they don't have to cover with a screen door or sliding patio screen door. Therma-Tru® vented sidelites are available in Fiber-Classic®, Oak Collection™ and Smooth-Star® for both entry and patio applications. The screen track and aluminum frame are also available in a bronze finish to complement door hardware and sills.

Choices ... for virtually any rough opening.

The perfect choice for new construction or remodel and replacement, vented sidelites work seamlessly in single hinge door or French door applications. Vented sidelites are available in 12" and 14" sidelite widths for inswing designs.

■ Single door with sidelites.

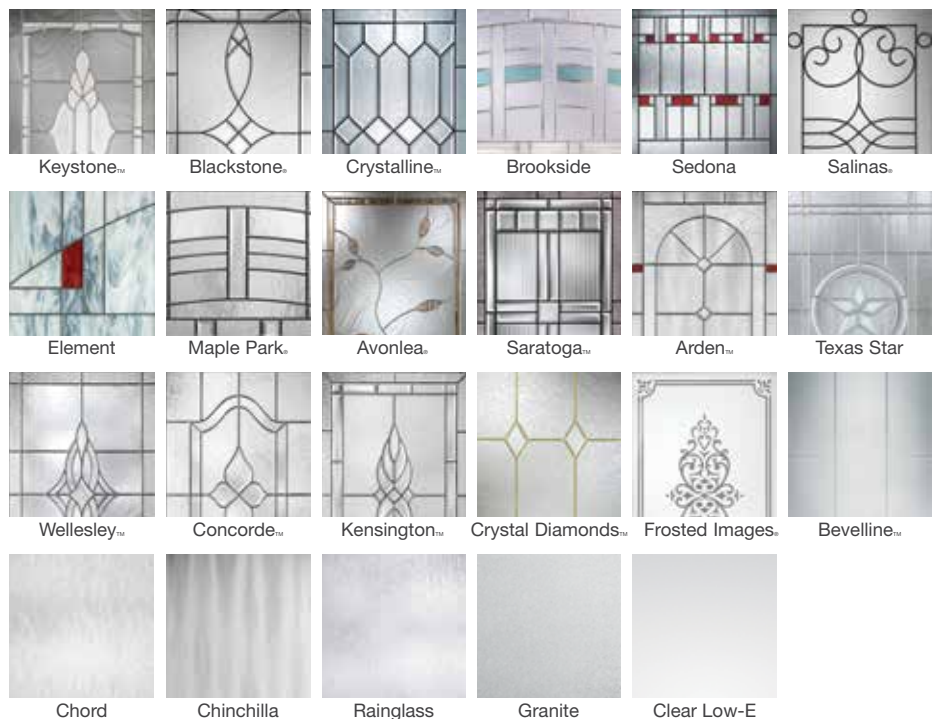

- 2'6"– 3'0" door opening widths.
- 12" & 14" sidelite widths.
- 6'6", 6'8", 8'0" heights.

■ French door with sidelites.

- 4'8"– 6'0" door opening widths.
- 12" & 14" sidelite widths.
- 6'6", 6'8", 8'0" heights.

Choices ... with any glass design.

As of today, only Therma-Tru offers vented sidelites with decorative glass design options. So not only can you offer your customers the advantages of ventilation, convenience and security, you'll offer aesthetic choices second to none. Choices different than any available on the market to differentiate your business.
