

TRUSTILE OFFERS NEW DOOR DESIGN OPTIONS

To support TruStile's goal of continually expanding and improving our product line, we are pleased to announce the availability of three exciting profile options that will set your doors apart.

Modern Quirk Moulding

TruStile's new Quirk Moulding provides a modern look with more dimension, detail and interest than a traditional flush door. Achieve dramatic results by selecting a different, contrasting species for the Quirk Moulding inlay (as shown). For your next modern project don't settle for an industrial looking flush door—differentiate with a distinctive TruStile door with Quirk Moulding!

Detail of Quirk Moulding in MDF

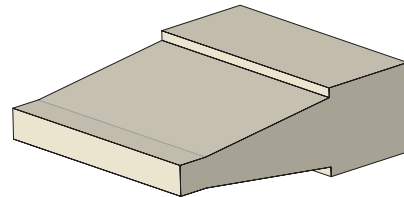

TS3000 in Mahogany with Maple Quirk Moulding (QM) and Flat (C) Panel

TS3000 in MDF with Bevel (BV) Sticking and Senior Bevel (F) Panel

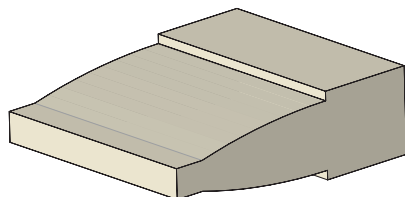

TS3000 in Cherry with Bevel (BV) Sticking and Senior Bevel (F) Panel

Senior Bevel "F" Panel

Elegant Senior Bevel Panel

This elegant panel can add elaborate styling to your next package of TruStile doors. Use the Senior Bevel panel to create a striking design element in either painted MDF or a refined wood species such as Cherry or Walnut.

Senior Raised "E" Panel

Classic Senior Raised Panel

This dramatic panel with wide, classical relief provides a rich, substantial look. Although often popular in rustic stained applications, the Senior Raised Panel is also impressive on painted MDF doors with raised Bolection Moulding.

TS2070 in MDF with Bolection Moulding (BM) and Senior Raised (E) Panel

TS3150 in Hickory with Ogee (OG) Sticking and Senior Raised (E) Panel
